About the Designer

Leon Boulter

I'm a Creative Designer who enjoys working on ambitious projects and helping turn ideas into strong, distinctive visual identities. I love taking a design brief, exploring its potential, and developing creative solutions that stand out from the crowd. There's a deep sense of satisfaction in helping shape a product or brand from the ground up, then continuing to develop, refine and maintain its visual identity.

Moshmallow

Moshmallows was one of the first game concepts where I was given significant creative freedom to explore and develop a wide range of ideas. The project allowed me to experiment with bold visual directions, blending Fun Sweet themes with metal/hard rock-inspired design elements. A key focus of the game was the creation of a set of animated Marshmallow characters that react to the player, along with animated Icons and a heavy metal soundtrack to boot.

"Moshmallow" is the property of UROC Studios. All rights reserved.

The first step was developing a strong visual identity for Moshmallows, built around the contrast between a fun, sweet and energetic candy world and the rebellious attitude of rock and metal culture. The aim was to create something colourful, playful and instantly approachable, while introducing heavier influences through bold typography, grungy textures, sharp graphic elements and music-inspired imagery.

As part of the concept for this game, developing a crowd mechanic while keeping the file size low was a priority. By utilising a simple base marshmallow design and adjusting for different skins/facial expressions cut back on animation time while satisfying the brief.

An important part of the design process is creating game icons and background elements that react dynamically to the player. In Moshmallows, winning icons come to life with unique animations, while the speakers bounce and become increasingly energetic as the game progresses. These reactive elements help make the experience feel more engaging, responsive and full of personality.

Rampage LTD

Date:

March 2024

Rampage

Rampage is a conceptual brand for a smash/rage room business. Customers are given a specific time window and are guided into a room where they can smash, break and destroy the interior contents.

The branding had to reflect the grungy and aggressive nature of the business and so it is reflected in the visual guides and logo.

Skills:

2D Character Animation

spine

Spine 2D

The Character Skulldrich was initially created using AI image generation (Midjourney) but then recieved minor edits to give him more of a edge. After the first character conceptes were completed, we created specific reference styles for the AI to follow and produce more dynamic poses.

Spine 2D was then used to animate the Skulldrich in different action poses to be placed in the different states of the game.

Skills:

Branding

UROC Branding

Arriving at UROC Studios as a startup, I was fortunate enough to be involved in the branding process. At the time, we only had a single logo. So I was tasked with flushing out the branding and creating assets that would later become key components in the webpage and social media sites.

Vertical Logo

Horizontal Logo

After being given the logo I established some basic rules and flushed out the visual imagery. After creating the basic brand guidelines, I recieved feedback and alterations before finalising and signing the project completed.

About US
1.1 - Our Values

Our Values

We live by Fun, Innovation, and Collaboration. Believing that passion drives creativity, so if we're not having fun, we're not doing it right. We push boundaries, constantly innovating and evolving to stay ahead. And just like a great band, we thrive on teamwork.

Style Usage
4.2 - Imagery

Imagery Usage

Brand Imagery usually consists of cyber cityscapes, depth of field effects and a foreground cutout of character or other content piece with hyperfocused detail.

Colour
2.3 - Colour Use

Colour

Our primary colours are used to contrast each other with neon blue and pink symbolizing our innovation and friendliness whilst maintaining professionalism.

CMYK: 80,73,60,81

Typography
3.0 - Primary Typeface

PRIMARY TYPEFACE

Oxanium

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
0123456789
!@~?%&*()+= _

Light Medium **Bold** **ExtraBold**

Oxanium is a square, futuristic font family that perfectly emulates our love for gaming and ensures legibility at small and headline sizes.

Once the Brand Guidelines were finalised I got the chance to work closely with the development team and design our website. I supplied basic layouts and graphical imagery to aid in the web development.

UROG Games

I was responsible for shaping the visual identity and creative direction of game projects, from initial concepts and branding through to final production. Here is a few Snippets as I cannot fit all the games into my Portfolio.

Skills:

Creative Experimentation

Dream Series

The Dream series is a set of psychadelic posters that were created to explore the range of different effects and styles that can be applied to static imagery. It was a chance to experiment with layouts, imagery and unconventional ideas.
